QUEST FOAMING STAIN AND PIGMENT REMOVER

Many pesticides contain performance-enhancing green dyes that severely stain equipment, walkways, tee markers, concrete, statuary, and other items that can be difficult to remove. Fertilizer staining is also prevalent and difficult to remove. **Quest Foaming Stain and Pigment Remover** eliminates this problem.

Quest Foaming Stain and Pigment Remover's unique chelating stain lifting remover is safe to use on most surfaces such as:

- Spray tanks
- Metal or fiberglass
- Plastic yardage markers
- Irrigation heads and covers
- Tee markers
- Concrete
- Asphalt and wooden cart paths
- Yardage plaques
- Statuary
- Plastic or wooden benches
- Tile and grout surfaces.
- Will not harm aluminum, stone or granite surfaces

Directions for use: Quest Foaming Stain + Pigment Remover is ready for use. Do not add additional water to the product. For best results, use the provided foaming squirt applicator. Wet treatment area and then spray apply liberally to stains. Wait several minutes for the product to activate then either wash or power wash off. For stubborn dried stains scrub with a brush or Teflon pad then rinse and repeat if necessary.

The following photos are from a client that regularly sprays dye containing products.

The staining is a few years old, and the customer has struggled to find a product to clean it effectively.

It was truly a spray-on and wipe-off process!
